

RAPCOM

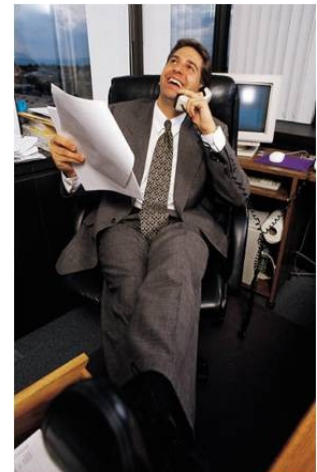

We accelerate your company at the speed of the changes

VoIP

Now it is the moment to enter in the new century and Rapcom is its front door. With our IP telephony service, your company will reduce the costs of communication up to 80%, plus adding flexibility and high tech to his operations.

Easy and simple: With a Telephone Adapter ATA or an IP Telephone, you can make calls that will be realised so easy and simple as their traditional telephone. If it needs portability you can use the Softphone or communications program for your portable computer and you will realise your calls from any part of the world. If your company owns an analogical or digital central telephone office simply connect it to us and your set!

Call Control: Through our WEB interface you will be able to control the consumption of his calls in real time. Similarly, you will be able to have different access levels to have more control and flexibility use of your account.

Plus:

No hidden costs.

No minimum consumption.

Prepaid for better expenditure control.

Optional: Access Control by password. (once you dial the destination number the system ask for a password. If it is invalid just hangup the call).
